

## For Public Disclosure

### FijiCare Insurance launches Fiji's first Insurance Mobile App

6<sup>th</sup> August, 2019

FijiCare Insurance Ltd is the first insurance company in Fiji to have created a mobile app for its policy holders. The introduction of this leading-edge digital platform enables FijiCare policy holders to have online access to their policy information, claims history, updates and their Insurance eCard. The new mobile app as well as the customer portal on the new, improved website will allow policy holders to access to their policy and claims details with a click of a button.

“Our new digital platforms will allow policy holders access to their own pertinent policy and claims information anytime and anywhere in real-time. This will not only improve our service to our clients, but also improves our processing efficiency between the company, policy holders and our service providers.”, said Mr. Avi Raju, Chairman of FijiCare.

FijiCare Insurance Limited plans to be the industry leader in insurance digital solutions. This revamped website and new mobile app is Phase One of FijiCare's investment into its Information Systems and Digital Platforms. This first of its kind insurance app is designed to help policyholders view their insurance policy details, insurance claims history, and their insurance eCard.

Phase Two will enable the integration of FijiCare's new mobile app with fitness wearable devices as well as with wellness and prevention programs. Using technology, the Company looks to combat the growing problem of non-communicable diseases in Fiji, leading to a reduction in healthcare and medical insurance costs.

In addition, FijiCare is currently working with international Fintech technology providers to introduce innovative digital solutions and insurance products.

The insurance mobile app is free to download from both Android's Google Play Store and Apple's App Store (pending) or through the FijiCare website link [www.fijicare.com.fj](http://www.fijicare.com.fj)
